

rain

2010

be ONE of 1,000

Dear Friend,

Rain-Central Missouri, Inc. (Rain) is in trouble and needs your help. Rain is a nonprofit organization that assists people living with HIV/AIDS in Mid-Missouri. It is also one of the states' leading prevention educational resources and a testing site for HIV, Hepatitis C and Sexually Transmitted Diseases (STDs).

We are asking 1,000 donors (individuals, businesses and organizations), to donate \$100. Your donation will enable the continuation of Rain's prevention education and testing program. In addition, you will be assisting with much-needed general operating expenses.

The Centers for Disease Control (CDC) estimates that "as many as one in two sexually active young people will contract an STD by age 25 -- and most won't know it". In fact, the CDC reports that "up to 70% of women with Chlamydia DO NOT have symptoms." According to STD reports for Mid-Missouri, 77% of females and 70% of males with an STD are 15 to 24 years of age.

Rain serves a region consisting of 35 Mid-Missouri counties. They are predominantly rural with the exception of Boone County, which has the largest population. In a recent MO Department of Health and Senior Services report for 2010, Boone County has the third highest number of STD cases in the state, behind only Jackson (Kansas City) and St. Louis counties.

Due to the difficult economic conditions, Rain has struggled to raise necessary funds. As a result, education and testing services are facing drastic cuts. Rain is one of the very few remaining sites to offer, free testing for HIV, Hepatitis C and STDs. Please donate today and help Rain continue providing health screenings and education that directly impacts the health of youth in our community.

Respectfully,

Cale Mitchell  
Rain Executive Director
